

INTRODUCES
THE NEW CC30 CRIMPER
AN ECONOMICAL HORIZONTAL CRIMPER

An economy horizontal crimper with a
125mm (4.9 inch) throat opening
and the capacity to crimp up to
2 inch 2 wire hose or 1-1/4 inch 6 wire hose

FEATURES AT A GLANCE

- 155 Ton Crimping force available (**Crimp up to 2 inch 2 wire hose**)
- Large **125mm (4.9 inch) throat opening** for right angle and special fittings
- **11,000 psi ValPower® pump** produces maximum force in a small package
- Precise, direct reading **digital adjustment** makes precise crimp settings simple
- **Coupling & Retraction stops** limit die travel and coupling insertion depth for faster repetitive crimps
- **Protective foam pads** prevent debris from damaging interior surfaces
- **Hold/Retract valve** allows operator to jog and hold at any point during set up
- **Manual/Automatic cycle** options
- **Foot Switch** speeds the production crimping process
- **Large oil reservoir** keeps components cool during repetitive crimping cycles
- **110V or 220V** single phase power options available

The CC30 has the largest through opening of any crimper in it's class. Right angle and special fittings fit easily from the rear of the crimper.

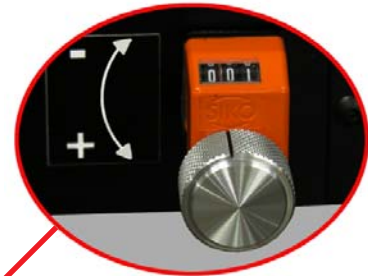

The CC30 is loaded with features that make it superior to any other crimper in its class.

Large 4.9 inch throat opening allows right angle and special fittings to be inserted from the rear of the crimper.

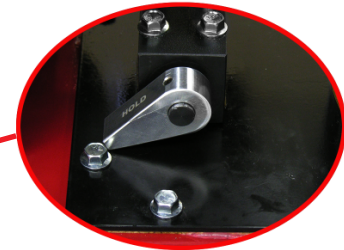

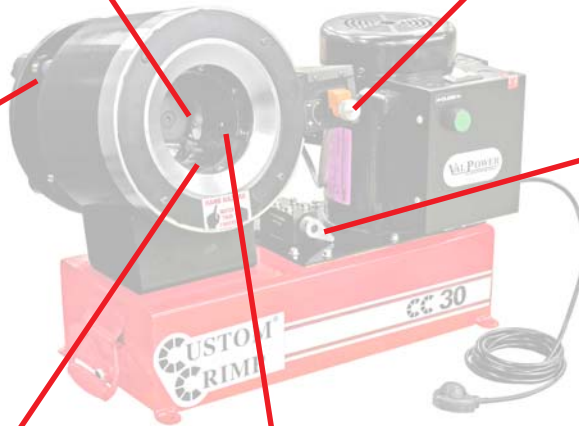

Magnetic die change tool makes changing dies a quick "no mess" operation

An easy to read digital gage provides precise, repeatable crimp settings.

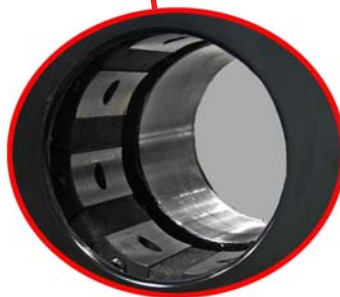

Built in Cylinder Retraction and Coupling Stop speeds repetitive crimps

Hold/Release valve permits the operator to jog and hold the dies in and position during setup

Grease Fittings in the master dies insure that lubrication gets where it is needed

Foam pads between the die fingers prevent debris from dropping into the critical surfaces and causing permanent damage when the die fingers are in the open position.

Available Die Storage Rack keeps dies organized and readily available

The CC30 Crimper offers the ease of use of a horizontal crimper with the power and precise adjustment capabilities usually found only in more costly models. Contact our technical service representatives at (219) 462-6128 for more information or request a quote at www.customcrimp.com
